

Router Animation

```
export const customAnimation = (_, opts: any) => {  
  const rootTransition = animationCtrl  
    .create()  
    .duration(opts.duration || 333)  
    .easing('cubic-bezier(0.7,0,0.3,1)');  
  
  const enterTransition = animationCtrl.create().addElement(getIonPageElement(opts.enteringEl));  
  const exitTransition = animationCtrl.create().addElement(getIonPageElement(opts.leavingEl));  
  
  if (opts.direction === 'forward') {  
    enterTransition.fromTo('opacity', '0', '1');  
    exitTransition.fromTo('opacity', '1', '0');  
  } else {  
    enterTransition.fromTo('opacity', '0', '1');  
    exitTransition.fromTo('opacity', '1', '0');  
  }  
  
  rootTransition.addAnimation([enterTransition, exitTransition]);  
  return rootTransition;  
};
```
