

Ionic Native Plugins nutzen

Verwendung
auth.service.ts

```
if (!this.platform.is('hybrid') || !(await this.fao.isAvailable())) {  
  console.warn('Biometric authentication not available');  
  // call WebAuthentication  
  this.authenticated = true;  
} else {  
  this.authenticated = await this.fao.show({  
    title: 'Face ID and Fingerprint authentication',  
    description: 'please authenticate',  
  });  
}
```
