

IndexedDB mit Dexie.js

```
@Injectable()
export class PictureIndexDbStore extends Dexie implements PictureStore {
  private pictures: Dexie.Table<PictureItem, number>;

  constructor() {
    super('ImmoPictureDexie', { autoOpen: true });
    this.version(1).stores({
      pictures: '++id, offerId',
    });
    this.pictures = this.table('pictures');
  }

  async savePicture(picture: PictureItem, id?: number): Promise<number> {
    return this.pictures.add(picture);
  }

  async getPicture(id: number): Promise<PictureItem> {
    return this.pictures.get(id);
  }
}
```
